## QuatTro

## M² INTERLOCKING GRIP TOP TILES

- High quality, anti-skid \& durable rubber floor tile
- Easy to lay and fit to size
- Interlocking connectable edges
- Attractive round studded surface
- Reversible for longer life expectancy
- Easy to clean surface
- High density 5MPA Rubber
- $1 \mathrm{~m} \times 1 \mathrm{~m}$ with Interlocking Edge
- 18 mm Thick

## 43MM DOG BONE PAVERS

- Made from a heavy duty durable crumb rubber
- High Density for Heavy Usage
- Easy interlocking design for area coverage
- Can be bonded for heavy traffic areas
- Slip resistant finish
- High impact and resilience
- Excellent protection from falls
- Attractive 'paved’ look design
- Easily replaced
- Available in Black, Red or Green

## Horse Walkers

## How to work out the area of a Horsewalker Walking Track in $\mathbf{m}^{2}$

Divide the Diameter of Horsewalker (A) by 2 to get the Radius (B)

## B x B x $3.14=$ Full Area of the Horsewalker

Take away the Walking Track Width (C) from the Radius (B). This will give you the Radius of the Inner Circle (D)
D x D x $\mathbf{3 . 1 4}$ = Area of the Inner Circle
Full Area of the Horsewalker minus the Area of the Inner Circle = Area of the Walking Track
If this is done in feet and not metres divide the final measurement by 10.76 to get the square meterage
