

**Q FLEX IS A SINGLE PACK, QUICK CURING URETHANE JOINT SEALANT THAT GIVES HIGH FLEXIBILITY AND IS RESISTANT TO AGEING**

### PREPARATION-DIRECTIONS-APPLICATION

Surface must be structurally sound, clean, dry & free of foreign matter. Remove oil, grease, asphalt, tar, paint, rust, wax waterproofing & form release agents.

For friable surfaces or water immersion Q/Seal should be used as a primer.

For best performance, depth of sealant should be one half the joint width. Minimum depth should be 6mm. Cure of sealant is dependant upon absorption of moisture from the atmosphere. Cure progresses faster under conditions of high relative humidity.

To apply, angle out nozzle to appropriate size and puncture inner seal. Remove metal cover from base of cartridge with a screwdriver and fit in cartridge gun.

Fill from bottom joint to prevent air pockets & voids. Sealant may be tooled with shaping tool moistened with water. Wipe off & leave joint concave. Clean equipment immediately after use with Q/Solve.

Available in 310ml Cartridges or 600ml Foils. Barrel gun required for 600ml Foils.
