

QUATTRO®

THE RUBBER & RESIN SPECIALIST

DOG BONE PAVERS

Dog Bone High Density Rubber Pavers for Equine use are excellent in Horsewalkers, Stable yards, American barns and equine bridges. 43mm thick heavy duty bricks with a slip resistant finish and high impact resistance. The easy interlocking design of Dog Bone High Density Rubber Pavers give an attractive paved look, as well as providing protection from falls.

DOG BONE PAVERS

When used in equine yards, the paving reduces the load on the horse's legs, back and muscles. The coefficient of friction under wet and dry conditions remarkably exceeds the coefficient of friction of concrete, asphalt or other common surfaces, so it minimizes the risk of injury to both horses and pedestrians.

PRODUCT	DIMENSIONS
Interlocking Dog Bone Paver	200mm x 165mm x 43mm

Approximately 35 bricks make up 1m².
