

QUATTRO[®]

Hollow Mats

The Rubber & Resin Specialists

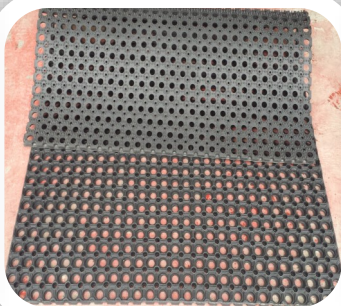

Once an area of grass has been fitted with Hollow Mats it will then become a safe and clean environment for Play Areas, Golf Courses, Caravan Parks and Schools.

This is an easy and economical solution requiring no specialist preparation. This allows the grass to grow through looking natural with no mud and mess.

Quattro's Heavy Duty Hollow Mats are 1.5m x 1m @ 22mm Thick and weigh 13kg each. Most standard Hollow Type mats only weigh 9 to 10kg

They also provide a great solution for muddy gateways where horses stand.

Hollow mats are excellent in gateways where severe puddling can occur. Horses and other animals can traffic these areas. They help to prevent mud fever as they overcome the normal sinking and muddy legs associated with gateways or over poached surfaces. When re-seeded the grass roots colonise the mats to give a solid base that can be used over and over without horses sinking knee deep. Pins and fixings are available to secure the mats but we find bag/cable ties provide this function safely.
