

Rubber Comfort Cow Mat's

- ✔ Provides protection and comfort for cattle
- ✔ Protects hocks, joints & knees
- ✔ Interlocking and straight edge available
- ✔ Honeycomb underside for ultimate comfort
- ✔ Promote blood flow to udder and teats

Rubber comfort cow mats have a honeycomb underside which provides extra softness and comfort that in turn protects hocks, joints & knees when lying down and rising.

Rubber comfort cow mats have an easy to clean low profile that will keep cows cleaner and drier with a minimal amount of bedding. Comfort and insulation helps to promote blood flow to udder and teats.

Both the straight edge and interlocking edge are easy to fit, we would recommend using heavy duty stainless steel fixings with washes, we find 8 fixings per mat works best.

Thickness	Size	Profile	Weight	MPA	Per Pallet	Tail Lift
25mm Straight	1.83m x 1.22m	Low Hammer Pattern	45kg	4mpa	30	15
25mm Interlocking	1.83m x 1.14m	Low Hammer Pattern	45kg	4mpa	30	15
